Office Action Summary	Application No. 10/572,907	Applicant(s) NAKAZAWA, NAOFUMI	
	Examiner Timothy J. Henn	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

[claims 1-7]

3. Claim 1 recites the limitation "each of which is composed of still images corresponding to the number of still images corresponding to the predetermined number of frames determined in advance" in lines 15 and 16. There is insufficient antecedent basis for "the number of still images" and "the predetermined number" in the claim.

4. Claims 2-7 are similarly rejected for their dependence on claim 1.

[claims 1-7]

5. Claim elements "moving image processing means", "selecting means", "two-screen image processing means", "panorama image selecting means", "panorama image processing means", "image display means" and "image means" are means (or step) plus function limitation that invokes 35 U.S.C. 112, sixth paragraph. However, the written description fails to disclose the corresponding structure, material, or acts for the claimed function. The specification refers to figure blocks to support these limitations, but does not provide any underlying structure to describe the blocks. Furthermore, the specification describes an "image processing unit" which appears to be a general

Art Unit: 2622

purpose processor, but does not describe any structure or algorithms which would allow the processing unit to perform the describe tasks.

Applicant is required to:

(a) Amend the claim so that the claim limitation will no longer be a means (or step) plus function limitation under 35 U.S.C. 112, sixth paragraph; or

(b) Amend the written description of the specification such that it expressly recites what structure, material, or acts perform the claimed function without introducing any new matter (35 U.S.C. 132(a)).

If applicant is of the opinion that the written description of the specification already implicitly or inherently discloses the corresponding structure, material, or acts so that one of ordinary skill in the art would recognize what structure, material, or acts perform the claimed function, applicant is required to clarify the record by either:

(a) Amending the written description of the specification such that it expressly recites the corresponding structure, material, or acts for performing the claimed function and clearly links or associates the structure, material, or acts to the claimed function, without introducing any new matter (35 U.S.C. 132(a)); or

(b) Stating on the record what the corresponding structure, material, or acts, which are implicitly or inherently set forth in the written description of the specification, perform the claimed function. For more information, see 37 CFR 1.75(d) and MPEP §§ 608.01(o) and 2181.

Allowable Subject Matter

Art Unit: 2622

6. Claims 1-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. However, it is noted that the indication of allowability will be reconsidered upon any amendments which change the scope of the claims.

7. While it is known in the art to capture and synthesize a plurality of images into a panoramic image (see prior art below for examples), the prior art does not teach or suggest a panoramic image device as claimed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
